DETAILED ACTION

Acknowledgment

1. This Office Action is responsive to the Amendment filed on 5/16/2007.

Accordingly, claims 1-9, 11-14, 16 and 17 are pending in this application.

Claim Objections

2. Claims 1, 11 and 16 are objected to because of the following informalities:

The recitation of "a unit bit cell" recited in claim 1, line 7 is suggested to change to – the unit bit cell --. Similar suggestion is applied for the same recitation recited in claim 11, line 10.

The recitation of "dhaf-symbol" recited in claim 11, line 11 is suggested to change to – half-symbol --.

The recitation of "15" recited in claim 16, line 1 is suggested to change to – 14 – since claim 15 has been canceled.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2611

4. Claims 1-3, 5-9, 11-14, 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Iverson et al (US 4,788,695; newly cited art).

Regarding claims 1-3, 5-9, 11-14, 16 and 17, Iverson, as shown in figures 3-6, teaches a method and apparatus for decoding a Manchester coded signal comprising integrating (52, 52A, 52B) the encoded input signal over half-symbol period and generating the difference (41, 61) which the difference may be used for determining (42) the logic value of the encoded signal. See also column 2, lines 21-23 and column 4, line 20 to column 6, line 32.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Iverson et al (US 4,788,695) in view of Walker (US 5,185,765).

Iverson teaches all subject matter claimed except for specifying the encoded signal is modulated as ASK, FSK, or PSK. However, Iverson teaches that the encoded signal is modulated as MFM and as well known in the art, the PSK is a variation of the MFM. See Walker: column 2, lines 16-32. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Iverson by using the PSK instead of

Art Unit: 2611

the MFM as taught by Walker since PSK is just a variation of MFM and such modification would not involve any inventive feature.

Response to Arguments

7. Applicant's arguments with respect to claims 1-9, 11-14, 16 and 17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference Paine (US 3,626,298) is cited because it is pertinent to the method and apparatus for decoding the bi-phase encoded signal using integrators.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2611

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
